I possess 12 years of experience as a technical lead, with about 8 years specifically in the banking domain. For approximately 5 years, I have worked as a contractor with DBS via IBM. During my time at IBM, I have played a crucial role as a tech lead, contributing significantly to the success of numerous high-impact projects at DBS Bank. My tenure has been distinguished by leadership, commitment, and technical expertise, especially in front-end leadership skills.

Below are some key highlights of my contributions:

Team Lead, Senior Mobile Application Developer (Nov 2019 - Present)
DAH (DBS Bank Singapore) - Contractor via IBM
Project Involvement and Achievements:
   Payments Resiliency (PayNow, Scan&Pay, Fast Transfer):
      Led the development of critical modules, ensuring high availability and reliability.
      Worked extensively on the front end, delivering robust solutions.
      Regularly put in extra hours and weekends to meet tight deadlines, ensuring on-time deliverables.
   Targeted Down Time :
      Played team lead role in the iOS & Android front end development.
      Contributions were highly praised by onsite stakeholders for quality and efficiency.
   Digi China 24/7 Fund Transfer:
      Developed and maintained the iOS & Android applications to facilitate seamless fund transfers.
      Ensured high performance and stability for the 24/7 operation from the SG location.
   Digibank Indonesia Retail App:
      Modules: MCA, Unit Trusts (UT), Fixed Deposits, and Production Defect Support.
      Delivered user-friendly and efficient solutions, enhancing the retail banking experience.
   Digibank Singapore Retail App:
      Modules: Simple Mode, PayNow PromptPay, and Exchange Currency.
      Received commendations for exceptional work on the PromptPay project from onsite stakeholders.

Associate, Investment & Insurance Module (May 2017 - Jun 2019)
DAH2 (Bank India, Hyderabad)
Project Involvement and Achievements:
   Sg Wealth Management Applications:
      Worked on applications including PBTPC, UTSTP, and MyWorkbench.
      Played the role of an individual contributor, focusing on quality and timely delivery.

Led the PBTPC project, ensuring successful implementation and high user satisfaction.

Technical Skills:
Objective-C, Swift
AngularJS, ReactJS, JavaScript
HTML, CSS
RESTful APIs
Jenkins, CICD.
Bitbucket and GitHub.
